

# National Hydropower Day

## August 24th

The Pacific Northwest is blessed with abundant carbon free Hydropower, which is the backbone for our base load power system for which millions of people rely on daily. Hydro provides a level of reliability which is unachievable by any other power source.

IBEW 77 celebrates today August 24, 2021 Nationally recognized Hydropower Day, and celebrates all of our hard working members who continue to “Bring Power to the People.” #HydroDay#OurPowerIsWater
